

BLACK HINGED AND BLIND COVERS

RAL 9011

RAL 7011: steel grey

RAL 9011: graphite black

HINGED COVERS - AND BLIND COVERS

Due to their success and the increasing demand, the RAL 9011 (graphite black) finish has now been included in the range.

Our product references will be specified as follows:

KDRV 11*304	becomes	KDRV 6*304 RAL 9011
BDRV 11*304	becomes	BDRV 11*304 RAL 9011
BDR 5*257	becomes	BDR 5*257 RAL 9011
BDV 5*257	becomes	BDV 5*257 RAL 9011
KDR 5*257	becomes	KDR 5*257 RAL 9011
KDV 5*257	becomes	KDV 5*257 RAL 9011
KDVV 5*257	becomes	KDVV 5*257 RAL 9011
KDRV 5*257	becomes	KDRV 5*257 RAL 9011

The references of our grey versions will end in RAL 7011

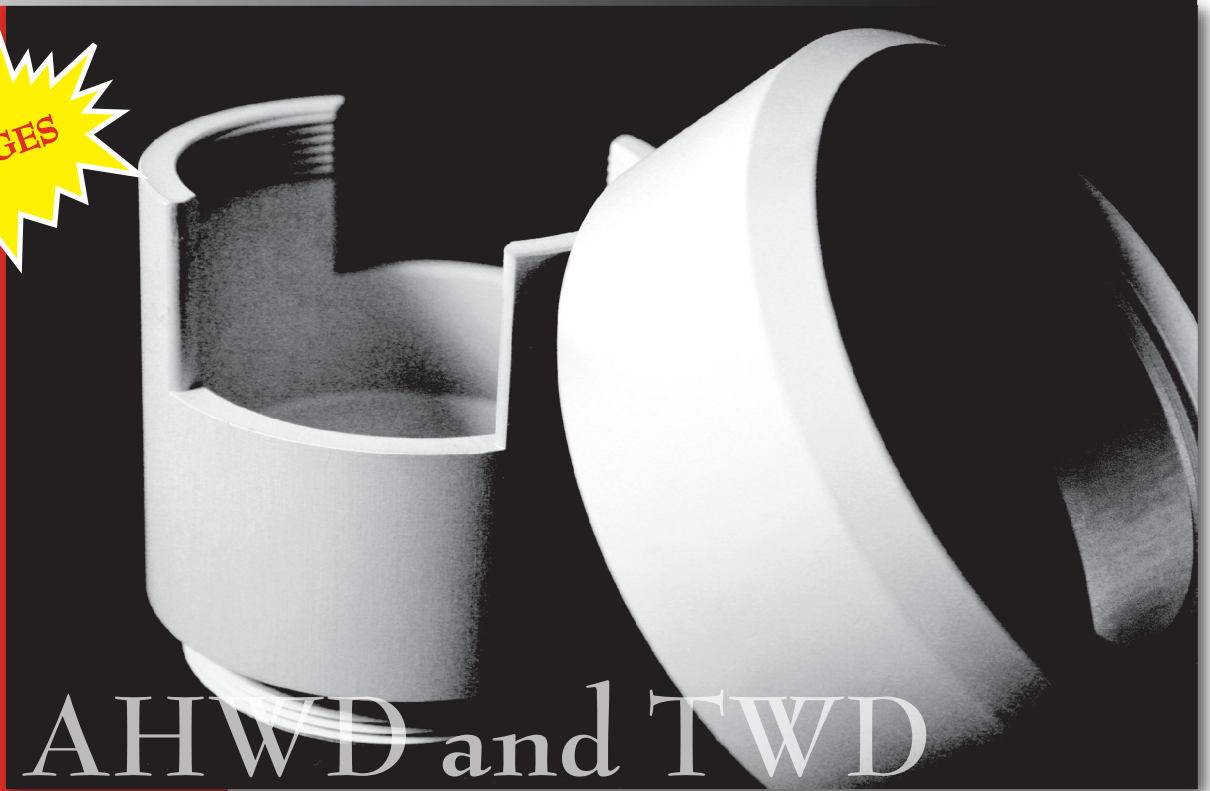

e.g.: KDRV 5*257 RAL 7011

WATERPROOF COVERS

AHWD and TWD

AHWD: cover housing

TWD: tube

KDVWD and ITKVWD

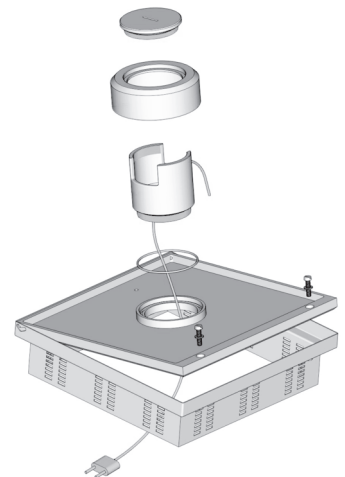

Both waterproof covers will be supplied in future without tube and cover housing, which cuts the price. Both the TWD tube and the cover housing AHWD are in stock and can always be ordered separately. The tube and cover housing protrude 65 mm above the level of the finish.

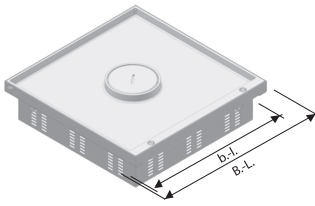

Material

Anodised aluminium

Availability: stock

ROUND HINGED COVERS

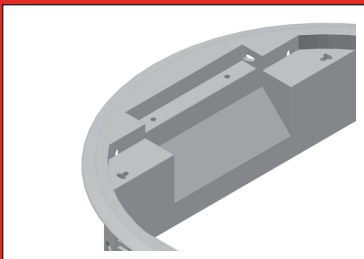

CHANGES

KDR and KDRV

KDR and KDRV

KDR 5*257 and KDRV 5*257

With the evolution of modern data cabling and to offer better guarantees of high-speed data transmission, it was decided to adapt the cable outlet of our little brother. Besides the change of the cable outlet a few months ago, we are now also looking at a solution so that the cables are distorted as little as possible when they are connected in our hinged covers.

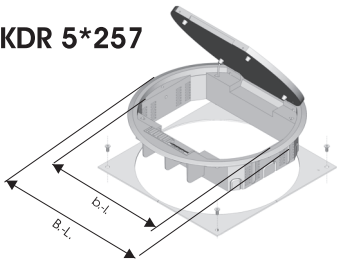

Material
Polypropylene

FILLING FRAME for KDRV 6*304

RKD

RKD: filling frame

Filling frame RKD for hinged cover KDRV 6*304

By fitting the filling frame under the metal plate, the depth of the cut-out can be levelled to suit the flooring. Hinged cover KDRV 6*304 is supplied as standard with a filling frame of 5mm (RKD 5*304) which means that the standard depth of the cut-out of the hinged cover is 6mm.

On request :

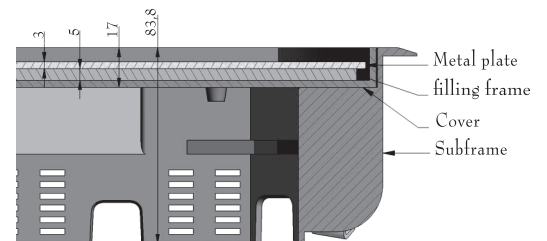

From 200 pcs upward, the hinged cover is available with a filling frame of 3mm (RKD 3*304). Depth of cut-out of the cover 8mm.

When removing the filling frame a depth of cut-out of the hinged cover of 11mm is obtained.

Material

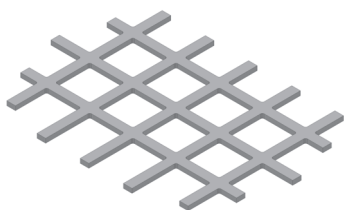

Polypropylene

FLOOR BOX for HEAVY LOADS

KITZ

**PANDORA V with KITZ
for heavy loads**

KIT for PANDORA V floor box for heavy loads

Thanks to this heavy-duty kit, you can increase the load capacity of the floor box, considerably. The kit is used in showrooms, garages or places where the floorbox may be subject to heavy loads up to a maximum of two tonnes.

The KITZ kit must be ordered separately and consists of eight VM6 nuts and four 6*60 screws.

cover ITKV 23*257, ITKVWD 23*257 and IKDV 26*257

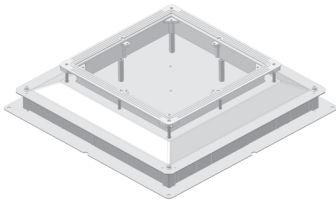

If a floor box for heavy loads is required, these three covers can be fitted with a metal plate 6 mm thick. Both metal plate of the blind cover ITKV 23*257 Z 6 and the metal plate of the waterproof tile cassette ITKVWD 23*257 Z 6 and the metal plate of the stainless steel hinged cover IKDV 26*257 Z 6 are only available on request.

Availability: stock

BOLT CUTTER for WIRE CABLE TRAYS

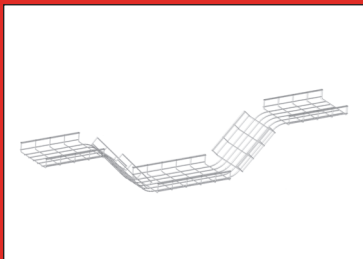

VFKNIP: bolt cutter

Bolt cutter VFKNIP for cutting wire cable trays

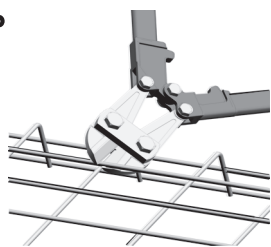

By means of a simple cut wire cable trays can be converted into bend, T-piece, crosspiece or reducer. In response to market demand, the bolt cutter with offset cut was included as standard in the range. Cutting always occurs as close as possible to the junction of the steel wires, to avoid damage to the cables.

SNAP SUSPENSION BRACKET

COMEGACL and LOMEGACL

COMEGACL

LOMEGACL

COMEGACL and LOMEGACL

Thanks to the snap version of the bracket clips, installation of the basket trays can be carried out quickly and efficiently. Due to the constant quest for product improvements, we have been able to make our COMEGACL and LOMEGACL universal.

The clippable ceiling profiles are now fitted as standard with slit holes, which makes it possible to use both basket trays and cable trays. Thanks to the standard height of 170 mm, these new ceiling profiles can also be installed without any problem in low double or false ceilings.

Material
Sendzimir

Availability: August 2005

INNOVATIVE SNAP CEILING PROFILE

KPCL and MPCL

KPCL: headplates

MPCL: profile

KPCL 41*21 and MPCL 41*21

The HSLECL is now also available in 2 separate clippable parts. This change has the major advantage that the brackets can be pre-fitted onto the profile and the headplates can easily be fitted into the ceiling.

Assembling the whole unit in this way is particularly easy.

Pay attention: The end plate should always be fixed with the supplied supporting plate STP. This system is revolutionary and extremely cost effective.

Moment for screw M10 with quality 8.8 : 133 Nm.

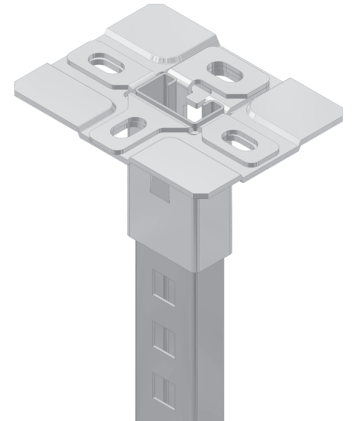

Tested according to: CEI/IEC 61537.

The MPCL 41*21 profile is available in length:

200-300-400-500-600-800-3000
